- March 23rd – SE Counties
- April 17th – SW Counties
- May 8th – Central Counties
- May 29th – State Capitals

Let it Snow! Let it Snow! Let it Snow!

4th grade Social Studies: We're now moving into Unit 2. Unit 2 (Chaps. 3-4) is about early Ohio. We'll move from the Adena and Hopewell cultures to the Seven Years War and into the Northwest Territory. Our first county quiz is less than a week away! Don't forget to study! The schedule for county quizzes is to the left.

4th grade Science: Our test over Chap. 4 was today! Tomorrow, we'll begin Unit 4: The Human Body (Chapters 13-14). Science Fair is quickly coming to a close! Keep checking those packets! **ONLY 16 SCHOOL DAYS LEFT UNTIL SCIENCE FAIR IS DUE!**

4th Grade Math: We just moved into a new unit! Our four chapter unit will focus on division. Chapter 13 begins division by learning to divide with remainders and the procedures for division. This is a short Chapter, so if all goes well, then we'll have a test on Tuesday next week.

5th grade Social Studies: We're now learning about the time between the wars. Shortly we'll be into World War II, and I would love to have veterans (both overseas and here on home front) from WWII come talk to our class about their experiences. If you know anyone that might be interested, then please let me know so I can contact them. This can also include their experiences going through The Great Depression. Thanks!

5th Grade Science: Many of you probably already heard last night that we discussed the physical, emotional, intellectual and social changes that take place during puberty. If you would like to know the changes that were covered, then open their Science book (the hard one) to pages 152-153 and check out the whole page (especially Quick Fact)

5th Grade Math: We're learning about algebra! Thank you for all your encouragement you've given to your students! I'm excited to see everyone catching on at their own pace! A little dinner time challenge..."Can you think of where math is not?" Hint: It's EVERYWHERE!
